

# MINTING GUIDE

## 1. Setting up your Wallet

The MetaMask wallet can be installed on Google Chrome, Firefox, or the Brave Browser. It's also available on iOS and Android.

When setting up MetaMask it is critical that you follow the setup instructions included with MetaMask and backup your recovery phrase somewhere extremely secure. Your recovery phrase controls all the funds you have in MetaMask. Never share it with anyone or enter it into any websites. **KarineDAO will never ask or prompt you for this information.**

## 2. Getting Ethereum

You can get ETH from Centralized Exchanges or Decentralized Exchanges and transfer it to your own private wallet - Metamask.

### 3. Mint Karines

The NFT's on the KarineDAO sell on a schedule. Buyers have to be invited on Whitelist to be able to mint in Tier 1 & 2. Public buyers can wait until the Public phase starts for minting. Buyers don't know which unique NFT they will get until shortly after the Revelation Date.

Buyers can get access to whitelist by participating in campaigns on our socials ([Instagram](#), [Linkedin](#)), or to join our contest on [Discord](#).

The minting schedule & fee on KarineDAO as follow:

	<b>Tier 1</b>	<b>Tier 2</b>	<b>Public</b>
<b>Minting Price</b>	0.05 ETH	0.05 ETH	0.075 ETH
<b>Minting Date</b>	15 March 2022, 8pm SGT	15 March 2022, 8pm SGT	17 March 2022, 8pm SGT
<b>Minting Limit</b>	3	1	10
<b>Revelation Date</b>	23 March 2022, 8pm SGT		

First, connect your wallet and choose "Mint Now" from the Homepage.

Then, in the purchase screen, select the number of NFTs you'd like to mint and click "Mint". MetaMask will prompt you to confirm the funds transfer required for the minting process based on the number of NFTs you've selected to mint, plus gas fees. Ensure the total amount in MetaMask looks correct and then click "Confirm". The ETH funds will be deducted from your wallet and your newly minted NFTs will be transferred to your address. You can view your NFTs on your wallet storefront on KarineDAO website.

An NFT purchase interface. On the left, there are two overlapping images of a woman. The top image is a pixelated, orange-toned version of her. The bottom image is a more realistic, color version of her wearing a pink top and a fluffy pink shawl. On the right, there is a minting form. It includes a 'PUBLIC SALE' section with a 'LIVE NOW' button. Below that, 'SUPPLY' is set to '1019/1515' and 'COST' is '0.075 ETH' with an Ethereum icon. A 'QUANTITY' section has a minus sign, the number '2', and a plus sign. At the bottom, there is a checked checkbox for 'I agree to the Term of Service of this collection' and a large pink 'MINT' button.

## 4. Swap your NFT

After the Revelation Date, Buyers will know which Karines they have minted. For Mosaic Karine which have only the default utilities, Buyers can exchange for a chance to attain a coveted Pink or Turquoise border Karine. NFT holders can swap any 2 of their mosaics in exchange for either a Pink Border or Turquoise Border NFT on the website.

Keep in mind that your swapped Mosaics will be transferred out of your wallet, and Buyers have to pay gas fee for swapping.

You can see the list of Karines tiers with its utilities on our **Whitepaper** ([English version](#) | [Chinese version](#)).
